

Debian Manpages

This is the complete repository of all manpages contained in Debian.
There are a couple of different ways to use this repository:

1. Directly jump to any manpage:
2. Navigate to the manpage's address, using this URL schema:
`/<suite>/<binarypackage>/<manpage>.<section>.<language>.html`
Any part (except `<manpage>`) can be omitted, and you will be redirected according to our best guess.
3. Read the intro pages for each section:
[intro\(1\)](#), [intro\(2\)](#), [intro\(3\)](#), [intro\(4\)](#), [intro\(5\)](#), [intro\(6\)](#), [intro\(7\)](#), [intro\(8\)](#), [intro\(9\)](#)
4. Browse the repository index:
 - [Debian trixie](#)
 - [Debian trixie-backports](#)
 - [Debian testing](#)
 - [Debian unstable](#)
 - [Debian experimental](#)
5. In your browser address bar, type enough characters of `manpages.debian.org`, press TAB, enter the manpage name, hit ENTER.

If you have more questions, check out the [About](#) page or the [Service Information](#).
